EDUCATION

Mahindra University, Hyderabad

B.Tech in Computer Science Engineering

Aug. 2023 – Present

Hyderabad, India

- Relevant Coursework: Data Structures & Algorithms, Design and Analysis of Algorithms, Machine Learning, Deep Learning, Statistics and Probability, Linear Algebra, OOPS, DBMS, Operating Systems

EXPERIENCE

PwC India — Cloud, Engineering and Data Analytics Intern

Cloud Engineering, Data & Analytics (CEDA)

Jun. 2026 – Present

Hyderabad, Telangana, India

- Undergoing structured training on Google Cloud Platform, building hands-on proficiency in BigQuery (joins, aggregations, query optimization) and Google Cloud Storage (GCS) for data engineering workflows
- Learning pipeline orchestration with Cloud Composer (Apache Airflow), including DAG design and automated workflow scheduling
- Practicing professional stakeholder communication and technical documentation in a client-facing advisory environment

PROJECTS

OPSD-PowerDesk: Electric Load Forecasting System

SARIMA, LSTM, GRU, PyTorch, CUDA-Enabled, Streamlit

Sep. – Dec. 2025

- Built an end-to-end time series forecasting pipeline on 50,000+ hourly observations across 3 countries (Austria, Belgium, Bulgaria), using leakage-safe 80/10/10 temporal splits
- Benchmarked 4 CUDA-enabled forecasting models (SARIMA, LSTM, GRU, RNN) via MASE, sMAPE, and RMSE for day-ahead load prediction
- Developed a dual anomaly detection system (Z-score, IQR, MAD + Isolation Forest, Random Forest) achieving 85%+ precision, deployed via an interactive Streamlit dashboard with live monitoring

Employee Attrition & Salary Prediction

Pandas, Scikit-learn, Logistic Regression, Ridge/Lasso, Seaborn

Sep. – Nov. 2024

- Built a multi-model classification pipeline (Logistic Regression, Decision Trees, SVM) on IBM HR Analytics data, achieving 82% F1-score for attrition risk prediction
- Developed regression models (Random Forest, Ridge, Lasso) forecasting salary under multiple increment scenarios, holding RMSE under 5% of mean salary
- Quantified \$2M+ in projected annual attrition-driven salary loss by combining risk scores with salary forecasts, surfacing high-risk segments via Seaborn dashboards

TRAINING PROGRAMS

Product Management — Generative & Agentic AI, BITSOM & Masai School

- 6-month online program on product management, GenAI tools, and agentic AI workflows

Sep. 2025 – Mar. 2026

Student Training Program on AI/ML — i-Hub, IIIT Hyderabad

- 6-month offline program covering machine learning, deep learning, and applied AI

Sep. 2024 – Mar. 2025

TECHNICAL SKILLS

Languages: Python, SQL, C, PostgreSQL, MySQL, HTML, CSS

Cloud & Data Engineering: Google Cloud Platform (BigQuery, GCS, Cloud Composer), Airflow, ETL Pipelines, DAG Orchestration

ML & Frameworks: PyTorch, Scikit-learn, Pandas, NumPy, Statsmodels, Matplotlib, Seaborn, Streamlit

Tools: Git, VS Code, Jupyter Notebook, CUDA
